

Distinctive® FL Powders

February 12, 2013

Luxurious Treated Minerals for Ultimate Smoothness

Resources Of Nature's surface treatment and processing technology dramatically alters the skin feel of natural mineral powders, making them more suitable for a much broader array of products and skin types. By using their specialized, hydrophobic fluorosilicone and silicone treatment on an array of mineral-based substrates, they have developed a line of super-luxurious "Distinctive® FL Powders".

Distinctive® FL Powders provide a unique dry, yet highly lubricious skin feel upon application. With excellent spreadability, they offer improved coverage for a more even finish to a variety of product types; emulsion makeups, hot pours, lipsticks and especially powder formulations. FL Powders are recommended for waterproof and long wear products where substantive materials are required. They can be used in w/Si and w/o emulsions, resulting in a soft velvety feel.

BENEFITS

- ◆ Smooth feeling
- ◆ Resists discoloration
- ◆ Hydrophobic
- ◆ Improved dispersability
- ◆ Excellent compatibility
- ◆ Improved wear

APPLICATIONS

- ◆ Color cosmetics
- ◆ Powders
- ◆ Hot pours
- ◆ Aesthetic enhancement
- ◆ Oil/shine control
- ◆ Anti-aging and soft focus products
- ◆ Wet/dry powders
- ◆ Sun care

AVAILABLE PRODUCTS

Distinctive® FL-Mica DC3882
Distinctive® FL-Sericite DC3883
Distinctive® FL-Talc DC3884
Distinctive® FL-TiO₂ DC3885

COMPOSITION

Mica (and) Dimethicone (and) Trifluoromethyl C1-4 Alkyl Dimethicone
Mica (and) Dimethicone (and) Trifluoromethyl C1-4 Alkyl Dimethicone
Talc (and) Dimethicone (and) Trifluoromethyl C1-4 Alkyl Dimethicone
Titanium Dioxide (Rutile) (and) Dimethicone (and) Trifluoromethyl C1-4 Alkyl Dimethicone
