

The Skin Fabric® Series

Jan. 21, 2016 rev.

Soft Breathable Cotton for a Flawless Finish

The Skin Fabric® Series is a line of cosmetic powders derived from whole cotton fibers, complexed with microfine spherical silica. These components are chemically bonded together by means of a special technology creating a unique cosmetic powder, ideal for both make up and skin care products.

With its enhanced light scattering capabilities, and light, velvety feel, the Skin Fabric® Series provides for a virtually flawless finish. Having a refractive index that closely matches that of human skin, Skin Fabric® delivers soft, natural looking coverage, filling in fine lines without looking white or chalky. The combination of natural plant fiber and silica microspheres in this complex provides optimal light diffusing properties to create a “soft focus” effect to further reduce the appearance of skin imperfections, and provide a smoother, more youthful finish.

BENEFITS

- ◆ Light diffusing
- ◆ Natural looking coverage
- ◆ Highly absorbent
- ◆ Breathable
- ◆ Smooth feeling
- ◆ Line filling
- ◆ Lash thickening
- ◆ Mattifying

APPLICATIONS

- ◆ Color cosmetics
- ◆ Powders
- ◆ Make up primer
- ◆ Aesthetic enhancement
- ◆ Oil/shine control
- ◆ Anti-aging and soft focus products
- ◆ Mascaras
- ◆ Skin care

The Skin Fabric® Series

TYPICAL PROPERTIES

Available with dimethicone treatment (standard) or in an all-natural lecithin treated version, the Skin Fabric® Series offers enhanced dispersibility, softness and excellent adhesion for long wear. Skin Fabric® Interference Pearl Complex contains interference red titanated mica to provide a softer, more radiant finish and healthy glow.
